

ArKaos Stadium Server

Code: 1310000160

The Stadium Server is the most powerful and versatile of the ArKaos Media Server Product Line designed for Professional Lighting Designers.

The six Full HD outputs combined with the powerful ArKaos engine from MediaMaster PRO will produce smooth visuals that can be easily triggered using a few DMX channels on your lighting desk or notes on a MIDI controller. The new improved version houses a fast SSD drive as standard, has a fast recovery system by Acronis and is shock resistant up to 2G. Get access to a vast library of high quality digital media from the world's best visual content providers.
