Europe Energy Saving Notice

Energy Saving Matters (EuP 2009/125/EC)

Saving electric energy is a key to help protecting the environment. Please turn off all electrical products when they are not in use. To avoid power consumption in idle mode, disconnect all electrical equipment from power when not in use. Thank you!

Unpacking: Thank you for purchasing the Par Z100 3K by ADJ Products, LLC. Every Par Z100 3K has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton appears to be damaged, carefully inspect your fixture for any damage and be sure all equipment necessary to operate the unit has arrived intact. In the event damage has been found or parts are missing, please contact our toll free customer support number for further instructions. Please do not return this unit to your dealer without contacting customer support first.

Introduction: The Par Z100 3K is a DMX intelligent, zooming, LED par fixture. The Par Z100 3K operates as a stand alone fixture. This fixture is suitable for theaters, studios, retail stores, and other similar locations. For best results use fog or special effects smoke to enhance the beam projections.

Customer Support: ADJ Products, LLC provides a customer support line, to provide set up help and to answer any questions that may arise during initial set up or operation. You may also visit us on the web at www.adj.com for any comments or suggestions. Service Hours are Monday through Friday 8:00 a.m. to 4:30 p.m. Pacific Standard Time.

Voice:	(800) 322-6337
Fax:	(323) 582-2941
E-mail:	support@adj.com

Warning! To prevent or reduce the risk of electrical shock or fire, do not expose this unit to rain or moisture.

Warning! This device can cause severe eye damage. Avoid looking directly into the light source for any reason!

To optimize the performance of this product, please read these operating instructions carefully to familiarize yourself with the basic operations of this unit. These instructions contain important safety information regarding the use and maintenance of this unit. Please keep this manual with the unit, for future reference.

Par Z100 3K

Features

- DMX-512 & RDM Protocol Support (4 DMX Channel Modes: 1 Channel, 2 Channels, 3 Channels & 4 Channels)
- 5-Pin XLR In/Out Connections
- Power In/Out Connections
- 6 Dimmer Curve Modes
- Digital Display for Address and Function Setting
- Gamma Correction Adjustment
- Dimming Frequency Adjustment
- Multiple Unit Power Linking (see **Multiple Unit Power Linking** section of this manual)

Par Z100 3K

Warranty Registration

The Par Z100 3K carries a 2 year (730 days) limited warranty. Please fill out the enclosed warranty card to validate your purchase and warranty. You may also register your product at www.adj.com. All returned service items, whether under warranty or not, must be freight pre-paid and accompanied by a return authorization (R.A.) number. If the unit is under warranty, you must provide a copy of your proof of purchase invoice. Please contact ADJ Products, LLC customer support for an R.A. number.

Par Z100 3K

Handling Precautions

Caution! There are no user serviceable parts inside this unit. Do not attempt any repairs yourself, as doing so will void your manufacturer's warranty. In the unlikely event your unit may require service, please contact ADJ Products, LLC.

During operation the housing may become extremely hot. Avoid touching the unit with bare hands while in use.

ADJ Products, LLC will not accept any liability for any resulting damages caused by the non-observance of this manual or any unauthorized modifications to this unit.

For Your Own Personal Safety, Please Read and Understand This Manual Completely Before You Attempt To Install Or Operate This Unit!

- To reduce the risk of electrical shock or fire, do not expose this unit to rain or moisture.
- Do not spill water or other liquids into or on to your unit.
- Be sure that the power outlet being used matches the required voltage for your unit.
- Do not attempt to operate this unit if the power cord is frayed or broken.
- Do not attempt to remove or break off the ground prong from the electrical cord. This prong is used to reduce the risk of electrical shock and fire in case of an internal short.
- Disconnect from main power before making any type of connection.
- Do not remove the cover for any reason. There are no user serviceable parts inside.
- Never operate this unit with the cover removed.
- Always be sure to mount this unit in an area that will allow proper ventilation. Allow about 6” (15cm) between this device and a wall.
- Do not attempt to operate this unit if it has been damaged in any way.
- This unit is intended for indoor use only. Use of this product outdoors voids all warranties.
- During long periods of non-use, disconnect the unit’s main power.
- Always mount this unit in safe and stable matter.
- Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to the point at which they exit from the unit.
- Cleaning - The fixture should be cleaned only as recommended by the manufacturer. See the ***Cleaning*** section of this manual for cleaning details.
- Heat - The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
- The fixture should be serviced by qualified service personnel when:
 - A. The power-supply cord or the plug has been damaged.
 - B. Objects have fallen onto, or liquid has been spilled into, the appliance.
 - C. The appliance has been exposed to rain or water.
 - D. The appliance does not appear to operate normally or exhibits a marked change in performance.

Power Supply: The ADJ Par Z100 3K contains an automatic voltage switch, which will automatically sense the voltage when it is plugged into the power source. With this switch, there is no need to worry about the correct power voltage, and this unit can be plugged in anywhere.

DMX-512: DMX is short for Digital Multiplex. This is a universal protocol that is used as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions from the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals located on all DMX fixtures (most controllers only have a DATA “OUT” terminal).

DMX Linking: DMX is a language allowing all makes and models of different manufacturers to be linked together and operate from a single controller, as long as all fixtures and the controller are DMX compliant. To ensure proper DMX data transmission, try to use the shortest cable path possible when linking several DMX fixtures. The order in which fixtures are connected in a DMX line does not influence the DMX addressing. For example, a fixture assigned a DMX address of 1 may be placed anywhere in a DMX line: at the beginning, at the end, or anywhere in the middle. When a fixture is assigned a DMX address of 1, the DMX controller knows to send DATA assigned to address 1 to that unit, no matter where it is located in the DMX chain.

Data Cable (DMX Cable) Requirements (For DMX and Primary/Secondary Operation): The Par Z100 3K can be controlled via DMX-512 protocol. The device has 4 DMX channel modes; please see the **Channel Mode** sections of this manual for the different modes. The DMX address can be configured using the control panel on the rear of the unit. Your unit and your DMX controller require an approved DMX-512 110 Ohm Data cable for data input and data output (Figure 1). We recommend Accu-Cable DMX cables. If you are making your own cables, be sure to use standard 110-120 Ohm shielded cable (This cable may be purchased at almost all professional sound and lighting stores). Your cables should be made with a male XLR connector on one end of the cable and a female XLR connector at the other. Also remember that DMX cable must be daisy chained and cannot be split.

Figure 1

Notice: Be sure to follow figures two and three when making your own cables. Do not use the ground lug on the XLR connector. Do not connect the cable's shield conductor to the ground lug or allow the shield conductor to come into contact with the XLR cable's outer casing. Grounding the shield could cause a short circuit and result in erratic behavior.

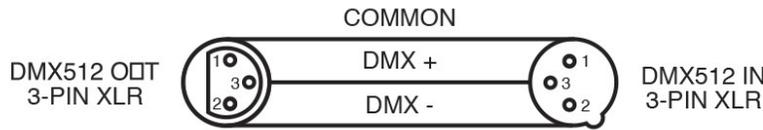

Figure 2

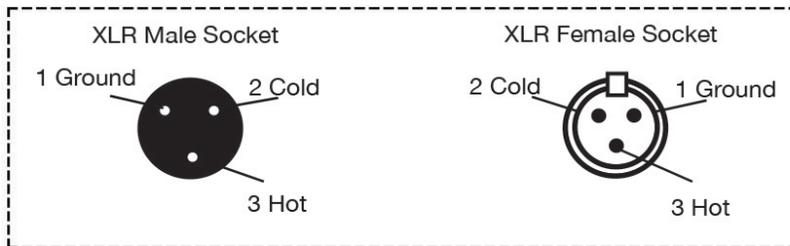

Figure 3

XLR Pin Configuration
Pin 1 = Ground
Pin 2 = Data Compliment (negative)
Pin 3 = Data True (positive)

Special Note: Line Termination. When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behavior. A terminator is a 110-120 ohm 1/4 watt resistor which is connected between pins 2 and 3 of a male XLR connector (DATA + and DATA -). This unit is inserted in the female XLR connector of the last unit in your daisy chain to terminate the line. Using a cable terminator (ADJ part number **Z-DMX/T**) will decrease the chances of erratic behavior.

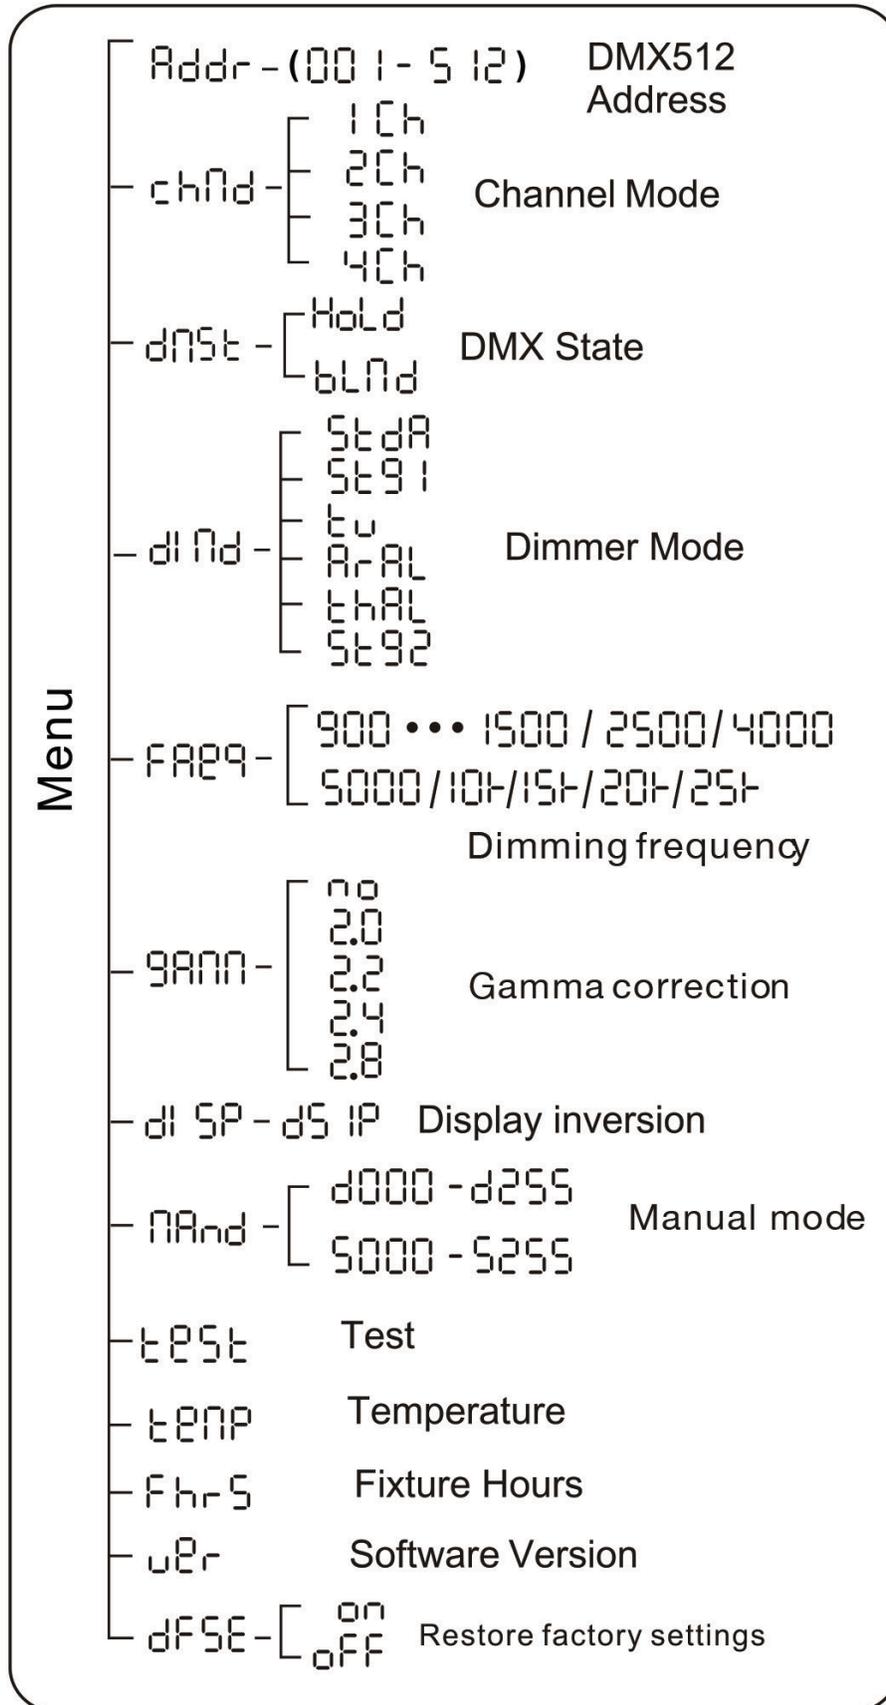

Termination reduces signal errors and avoids signal transmission problems and interference. It is always advisable to connect a DMX terminal, (Resistance 120 Ohm 1/4 W) between PIN 2 (DMX-) and PIN 3 (DMX +) of the last fixture.

Figure 4

5-Pin XLR DMX Connectors. Some manufacturers use 5-pin DMX-512 data cables for DATA transmission in place of 3-pin. 5-pin DMX fixtures may be implemented in a 3-pin DMX line. When inserting standard 5-pin data cables into a 3-pin line, a cable adaptor must be used. These adaptors are readily available at most electronics stores. The chart below details a proper cable conversion.

3-Pin XLR to 5-Pin XLR Conversion		
Conductor	3-Pin XLR Female (Out)	5-Pin XLR Male (In)
Ground/Shield	Pin 1	Pin 1
Data Compliment (- signal)	Pin 2	Pin 2
Data True (+ signal)	Pin 3	Pin 3
Not Used		Do Not Use
Not Used		Do Not Use

System Menu: When making adjustments, press **ENTER** to confirm your setup then press and hold the **MENU** button for at least 3 seconds. To exit without making any adjustments, press the **MENU** button. After 30 seconds of inactivity, the screen will lock; to unlock the screen, press the **MENU** button for 3 seconds.

Addr - DMX Address Setting.

1. Press either the MENU, UP, or DOWN buttons until “Addr” is displayed, then press ENTER.
2. The current address will now be flash in the display screen. Press the UP or DOWN buttons to find your desired address. Press ENTER to set your desired DMX address.

ChNd - This will select your desired DMX channel.

1. Press either the MENU, UP, or DOWN buttons until “ChNd” is displayed, and press ENTER. The current DMX channel mode will be displayed.
2. Press the UP or DOWN buttons to find your desired DMX channel mode and press ENTER to confirm and exit.

dNSt - This mode defines how the device will behave in the event that DMX communication is lost or interrupted. It also defines the operating mode that the device will start up in when power is applied.

1. Press either the MENU, UP, or DOWN buttons until “dNSt” is displayed. Either “BLND” or “HOLD” will be displayed beneath.
2. Press ENTER and the bottom row of text will begin to flash. Use the UP or DOWN buttons to choose an operating mode you would like the unit to default to when power is applied or the DMX signal is lost.
 - BLND (Blackout) - If the DMX signal is lost or interrupted, the unit will automatically go into stand by mode.
 - HOLD - If the DMX signal is lost the fixture will stay in the last DMX setting. If power is applied and this mode is set, the unit will automatically go into the last DMX set up.
3. Press ENTER to confirm your desired set up.

dINd - This will let your select your desired dimmer curve.

1. Press either the MENU, UP, or DOWN buttons until “dINd” is displayed, and press ENTER. 1 of 6 dimmer curves will be displayed. See the **Dimmer Curve Chart** section of this manual for details.
 - “STDA” (standard)
 - “STG1” (Stage 1)
 - “TV” (TV)
 - “ARAL” (Architectural)
 - “THAL” (Theatre)
 - “STG2” (Stage 2)
2. Press the UP or DOWN buttons to find your desired dimmer curve, then press ENTER to confirm and exit.

FReq - With this function you can adjust the dimming frequency.

1. Press either the MENU, UP, or DOWN buttons until “FReq” is displayed, and press ENTER.
2. Use the UP or DOWN buttons to adjust the dimming frequency between 900hz, 1000hz, 1100hz, 1200hz, 1300hz, 1400hz, 1500hz, 2500hz, 4000hz, 5000hz, 10000hz, 15000hz, 20000hz, or 250000hz.
3. Once you have found your desired dimming frequency press ENTER to confirm.

gANN - In this menu you are able to make gamma corrections.

1. Press either the MENU, UP, or DOWN buttons until “gANN” displayed, then press ENTER.
2. Use the UP or DOWN buttons to select gamma corrections.
3. Once you have found your desired gamma correction value, press ENTER to confirm.

dISP - This function will invert the display 180 degrees.

1. Press either the MENU, UP, or DOWN buttons until “dISP” is displayed, and press ENTER.
2. Press the UP button to select “DSIP” to “flip” the display, or “DISP” to revert the display to normal. Press ENTER to confirm.

NAnd - This function will allow you to manually adjust the brightness, fine dimming, and strobing. Please note that fine dimming and strobing are used only with 3-channel mode.

1. Press either the MENU, UP, or DOWN buttons until “NAnd” is displayed, then press ENTER.
2. Use the UP and DOWN buttons to scroll through the settings, and press ENTER when you have found your desired function for adjustment.
3. Use the UP and DOWN buttons to adjust the values. Once you have made your adjustments, press ENTER to set them. Press the MENU button to exit.

teSt - This function will run a self test program.

1. Press either the MENU, UP, or DOWN buttons until “teSt” is displayed, then press ENTER.
2. The fixture will now run a self test. Press the MENU button to exit and quit the self test.

tENP - With this function you can check the temperature of the fixture.

1. Press either the MENU, UP, or DOWN buttons until “tENP” is displayed, then press ENTER.
2. The fixture temperature will now be displayed. Press MENU to exit.

FhrS - With this function you can display the running time of the unit.

1. Press either the MENU, UP, or DOWN buttons until “FhrS” is displayed, then press ENTER.
2. The running time of the fixture will now be displayed. Press MENU to exit.

ver - Use this function to display the software version of the unit.

1. Press either the MENU, UP, or DOWN buttons until “ver” is displayed, then press ENTER.
2. The display will now show the software version.

dFSE - Use this function to reset to default settings.

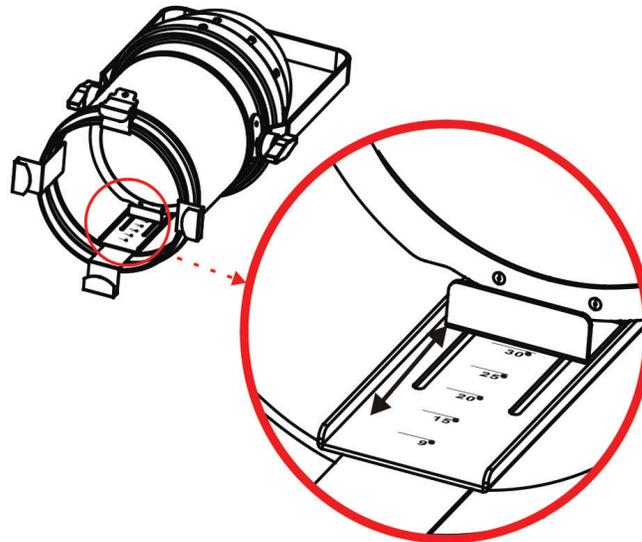

1. Press either the MENU, UP, or DOWN buttons until “dFSE” is displayed, then press ENTER.
2. The display will show “on” or “oFF”. Use the UP or DOWN buttons to scroll, and press ENTER to make a selection. “On” will default to factory settings. Press the MENU button to exit without change.

Universal DMX Control: This function allows you to use a universal DMX-512 controller to control the dimmer, fine dimmer, strobe, and dimmer curve. A DMX controller allows you to create unique programs tailored to your own individual needs.

1. The Par Z100 3K has 4 DMX channel modes: 1 channel mode, 2 channel mode, 3 channel mode, and 4 channel mode. See the **Channel Mode** sections of this manual for detailed descriptions of the DMX values and traits.
2. To control your fixture in DMX mode, follow the set-up procedures in the **DMX Set Up** section of this manual, as well as the set-up specifications that are included with your DMX controller.
3. Use the controller's faders to control the various DMX fixture traits. This will allow you to create your own programs.
4. Follow the instructions in the **System Menu** section of this manual to select your DMX channel mode and set your desired DMX address.
5. For longer cable runs (more than a 100 feet) use a terminator on the last fixture.
6. For help operating in DMX mode consult the manual included with your DMX controller.

To adjust the beam angle, slide the beam angle adjuster located inside/in front of the lens. See the diagram below for reference.

The beam angle can be adjusted manually, between 9°/ 15°/ 20°/25°/ 30°.

Par Z100 3K

Installation

The unit should be mounted using a mounting clamp (not provided), which should be affixed to the mounting bracket that is provided with the unit. Always ensure that the unit is firmly fixed to avoid vibration and slipping during operation. Always ensure that the structure to which you are attaching the unit is secure and is able to support a weight of at least 10 times the unit's weight. Also, always use a safety cable that can hold at least 12 times the weight of the unit.

The equipment must be installed by a professional, and it must be installed in a place where it is out of the reach of people's grasp.

Par Z100 3K

Multiple Unit Power Linking

These devices can be linked together using the power input and output sockets.

The maximum number of devices that can be linked in this way are as follows:

- 15 fixtures maximum @ 120V
- 25 fixtures maximum @ 230V

Once this maximum number has been reached, a new power outlet will be required to accommodate additional fixtures.

NOTE: USE CAUTION WHEN POWER LINKING OF DIFFERENT MAKE AND MODEL TYPES, AS THE POWER CONSUMPTION OF OTHER LIGHTING FIXTURES WILL VARY!

Unplug the unit from any power source it may be connected to. Once the power has been disconnected, use a Phillips head screw driver to unscrew the fuse holder located above the power input. Remove the bad fuse and replace with a new one, and screw the fuse holder back in.

Due to fog residue, smoke, and dust, cleaning the internal and external optical lenses and mirror should be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates (i.e. smoke, fog residue, dust, dew). In heavy club, cleaning on a monthly basis is recommended. Periodic cleaning will ensure longevity and crisp output.

- Use normal glass cleaner and a soft cloth to wipe down the outside casing.
- Use a brush to wipe down the cooling vents and fan grill.
- Clean the external optics with glass cleaner and a soft cloth every 20 days.
- Clean the internal optics with glass cleaner and a soft cloth every 30-60 days.
- Always be sure to dry all parts completely before plugging the unit back in.

Listed below is a common problem that you may encounter, with possible solutions.

No light output from the unit:

- Be sure the external fuse has not blown. The fuse is located on the rear panel of the unit.
- Be sure the fuse holder is completely and properly seated.

- A. ADJ Products, LLC hereby warrants, to the original purchaser, ADJ Products, LLC products to be free of manufacturing defects in material and workmanship for a prescribed period from the date of purchase (see specific warranty period on reverse). This warranty shall be valid only if the product is purchased within the United States of America, including possessions and territories. It is the owner's responsibility to establish the date and place of purchase by acceptable evidence, at the time service is sought.
- B. For warranty service, you must obtain a Return Authorization number (RA#) before sending the product back—please contact ADJ Products, LLC Service Department at 800-322-6337. Send the product only to the ADJ Products, LLC factory. All shipping charges must be prepaid. If the requested repairs or service (including parts replacement) are within the terms of this warranty, ADJ Products, LLC will pay return shipping charges only to a designated point within the United States. If the entire instrument is sent, it must be shipped in its original package and packaging material. No accessories should be shipped with the product. If any accessories are shipped with the product, ADJ Products, LLC shall incur no liability whatsoever for loss of or damage to any such accessories, nor for the safe return thereof.
- C. This warranty is void if the product serial number and/or labels are altered or removed; if the product is modified in any manner which ADJ Products, LLC concludes, after inspection, affects the reliability of the product; if the product has been repaired or serviced by anyone other than the ADJ Products, LLC factory unless prior written authorization was issued to purchaser by ADJ Products, LLC; if the product is damaged because it was not properly maintained as set forth in the product instructions, guidelines and/or user manual.
- D. This is not a service contract, and this warranty does not include maintenance, cleaning, or periodic checkup. During the period specified above, ADJ Products, LLC will replace defective parts at its expense with new or refurbished parts, and will absorb all expenses for warranty service and repair labor by reason of defects in material or workmanship. The sole responsibility of ADJ Products, LLC under this warranty shall be limited to the repair of the product, or replacement thereof, including parts, at the sole discretion of ADJ Products, LLC. All products covered by this warranty were manufactured after August 15, 2012, and bear identifying marks to that effect.
- E. ADJ Products, LLC reserves the right to make changes in design and/or improvements upon its products without any obligation to include these changes in any products theretofore manufactured.

No warranty, whether expressed or implied, is given or made with respect to any accessory supplied with products described above. Except to the extent prohibited by applicable law, all implied warranties made by ADJ Products, LLC in connection with this product, including warranties of merchantability or fitness, are limited in duration to the warranty period set forth above. And all warranties, whether expressed or implied, including warranties of merchantability or fitness, are limited in duration to the warranty period set forth above. The consumer's and/or dealer's sole remedy shall be such repair or replacement as is expressly provided above; and under no circumstances shall ADJ Product, LLC be liable for any loss and/or damage, direct and/or consequential arising out of the use of, and/or inability to use this product.

This warranty is the only written warranty applicable to ADJ Products, LLC products, and supersedes all prior warranties and written descriptions of warranty terms and conditions heretofore published.

MANUFACTURER'S LIMITED WARRANTY PERIODS:

- Non-LED Lighting Products = 1-Year (365 Days) (Including Special Effect Lighting, Intelligent Lighting, UV lighting, Strobes, Fog Machines, Bubble Machines, Mirror Balls, Par Cans, Trussing, Lighting Stands, Power/Data Distribution, etc. excluding LED and lamps)
- Laser Products = 1-Year (365 Days) (excluding laser diodes which have a 6-Month Limited Warranty)
- LED Products = 2-Year (730 Days) (excluding batteries which have a 180 Day Limited Warranty)
- NOTE: 2-Year (730 Days) Limited Warranty ONLY applies to product purchased within the United States.
- StarTec Series = 1-Year (365 Days) (excluding batteries which have a 180 Day Limited Warranty)
- ADJ DMX Controllers = 2 Year (730 Days)
- American Audio Products = 1 Year (365 Days)
